Progress in Surface Science

EDITOR-IN-CHIEF:
PROF. SYDNEY G. DAVISON

MANAGING EDITOR:
PRUDENCE G. DAVISON

EDITORIAL OFFICE
Applied Mathematics Department
University of Waterloo
Waterloo, Ontario
Canada N2L 3G1

Tel: **(519) 888-4533**
Fax: **(519) 746-6530**
e-mail: **pdavison@watdcs.uwaterloo.ca**

ADVISORY BOARD

I. BARTOŠ
Academy of Sciences
Prague, Czechoslovakia

B.E. CONWAY
University of Ottawa
Ontario, Canada

A.S.G. CURTIS
University of Glasgow
Scotland

A.W. CZANDERNA
NREL
Golden, Colorado, U.S.A.

J.G. DILLARD
Virginia Polytechnic Institute
and State University
Blacksburg, Virginia, U.S.A.

D.D. ELEY
University of Nottingham
England

P.J. ESTRUP
Brown University
Providence, R.I., U.S.A.

V.E. HENRICH
Yale University
New Haven, Connecticut, U.S.A.

S. KONO
Tohoku University
Aobaku, Japan

J. KOUTECKY
Freie Universität
Berlin, Germany

R.M. LATANSION
MIT
Cambridge, Mass., U.S.A.

J.D. LEVINE
Texas Instruments
Dallas, Texas, U.S.A.

A.A. MARADUDIN
University of California
Irvine, California,
U.S.A.

K. MULLER
University of Erlangen-Nurnberg
Germany

A.G. NAUMOVETS
Academy of Sciences
Kiev, Ukraine

J.B. PENDRY
Imperial College
London, England

S.T. PICRAUX
Sandia National Laboratory
Albuquerque, New Mexico, U.S.A.

T.N. RHODIN
Cornell University
Ithaca, New York, U.S.A.

M. STĘŚLICKA
University of Wrocław
Poland

H. TI TIEN
Michigan State University
East Lansing, Michigan, U.S.A.

H. UEBA
Toyama University
Japan

L. WEISS
Roswell Park Memorial Institute
Buffalo, New York, U.S.A.

R.F. WILLIS
Pennsylvania State University
University Park, Pennsylvania, U.S.A.

K. ZHANG
Fudan University
Shanghai, People's Republic of China

Production Editor: Douglas Cherno, Pergamon Press, Tarrytown, New York.

Publishing, Subscription and Advertising Offices: Pergamon Press Inc., 660 White Plains Road, Tarrytown, New York 10591-5153, U.S.A., E-mail Address: ESUK.USA@ELSEVIER.COM; and Pergamon Press Ltd., Headington Hill Hall, Oxford OX3 0BW, England.

Published Monthly: *Annual Institutional Subscription Rate* (1993): £360.00 (US$576.00). Sterling prices are definitive. US dollar prices are quoted for convenience only, and are subject to exchange rate fluctuation. Prices include postage and insurance and are subject to change without notice.

List of Contents, Volume 42, 1993

Proceedings of the Sixteenth International Seminar on
Surface Physics, Kudowa, Poland, October 5–10, 1992
Guest Editor: M. STĘŚLICKA

1. Special Session on Surface States

a. Historical Introduction 3
b. Surface States 21
c. Image States 67

2. Field Emission Session 97

3. Thin Films 189

4. Adsorption 219

5. Interfaces 271

6. Electronic Structure of Surfaces 319

7. Other Topics 367

Programme of the Seminar 393

List of Participants 407

Contents of Vacuum (Contributed Papers) 417

SUBJECT INDEX

Ab-initio molecular dynamics. See also Car-Parinello molecular dynamics
  Car-Parinello approach to
    SC surface problems and 321-322
    SC surface properties from 322-325
  GaAs surfaces, clean and hydrogenated 325-329
Adsorption
  adlayer on SC surfaces
    chemical trends in 351-362
  As, Se, Cl on Si(001)
    comparison of electronic structure: Si(001)-(2x1) and As:Si(001)-(1x2) 359-361
    energy-optimized structure of 357-358
    equilibrium configuration, Se:Si(001)-(1x1) 358, 359
    total valence charge density of 359
  Cl:Si(001)
    dimer model compared with ARPS study 361
  hydrogen. See also under Hydrogen adsorption
    on group 1 B metals 231-241
    on transition metals 245-255
  on SC surfaces
    chemical trends in 351-361
    S:Ge(001)-(1x1), structure and electronic structure 361
Angle-resolved photoemission spectroscopy (ARPS)
  temperature effects of 331-349
    bulk energy dispersion curves 333-334
    direct transitions 334-336 340-341
    early work 333-342
(ARPS, cont.)
    inverse photoemission transitions into bulk and surface 340-341
    k-space integration, phonon-improved 345-348
    line intensities, from Cu(110) and (111) 339
    new experimental results from Cu(100) and (111) 342-345
    nondirect, phonon-assisted transitions 334, 336, 337-338, 340-341
    on normal emission from Cu(110) 336-337
    outlook on 348-349

PROGRESS IN POLYMER SCIENCE

AN INTERNATIONAL REVIEW JOURNAL

Editor: **O. VOGL**, *Polytechnic University, 333 Jay Street, Brooklyn, NY 11201, USA*
Associate Editor: **L. S. CORLEY**, *Shell Development Co, Westhollow Research Center, PO Box 1380, Houston, TX 77001, USA*

Progress in Polymer Science publishes state-of-the-art overview articles by internationally recognized authorities in polymer science and engineering, one of the fastest growing disciplines. The journal provides a link between original articles, innovations published in patents, and the up-to-date knowledge of technology. It publishes review articles on subjects not only within the traditional fields of polymer science and technology - chemistry, physics and engineering involving polymers - but also within interdisciplinary developing fields such as functional and speciality polymers, biomaterials, polymers and drug delivery, polymers in electronic applications, composites, conducting polymers, liquid crystalline materials and the interphases between polymers and ceramics, and new fabrication techniques, where significant contributions are being made. Contributors are usually invited by the editor; however, authors wishing to submit to the journal are encouraged to submit an abstract of their article to the editor.

PROGRESS IN QUANTUM ELECTRONICS

AN INTERNATIONAL REVIEW JOURNAL

Executive Editor: **P. T. LANDSBERG,** *Faculty of Mathematical Studies, University of Southampton, Highfield, Southampton, SO9 5NH, UK*
North American Editor: **M. OSINSKI,** *Center for High Technology Materials, University of New Mexico, Albuquerque, NM 87131-6081, USA*

Progress in Quantum Electronics covers a diverse collection of topics, many of which now have well established technological applications but all of which contain a wide variety of problems and techniques in the realm of pure science. It is mainly concerned with the broad field of interaction of radiation and matter, e.g. in lasers or photodetectors, but also includes solid state topics such as superconductivity and quantum effects in semiconductors.

A Selection of Recent Reviews
E. O. GÖBEL & K. PLOOG (Germany), Fabrication and optical properties of semiconductor quantum wells and superlattices.
T. IMASAKA & N. ISHIBASHI (Japan), Analytical techniques using lasers.
A. ROGALSKI (Poland), $InAs_{1-x}Sb_x$ infrared detectors.
K. A. SHORE & M. W. MCCALL (UK), Nonlinear and quantum optics in semiconductor lasers.
